

Versatile, Virtually Indestructible and Ready for the Extreme

Not just a camera enclosure but an engineered outdoor housing system that is designed to expand all indoor camera models into complete rugged outdoor system solutions.

Virtually Indestructible: We produce the world's toughest enclosures. They will not corrode, rust, leak and have proven to withstand a whole world of abuse.

No matter the climate we take outdoor temperature protection very seriously: Extreme Hot climates, Cold climates, Marine and everywhere in between.

innovative

D3-CD: Dotworkz D3 COOLDOME™ 12VDC Active Cooling Camera Enclosure

Description:

The large full size D3 COOLDOME™ is the most advanced outdoor camera protection system available designed protect both cameras and other system related hardware all in one easy to install engineered form factor. Designed as our complete outdoor solution housing for advanced camera system deployments.

Dotworkz D3 has taken protection to the next level for climates where temperatures exceed 105° F (41°C) but reaches as high as 155° F (68°C) the COOLDOME™ is the answer.

Specs:

Operating Temperature (Absolute):
-40° to 160°F (-40°C to 71°C)
Operating Temperature (Recommended):
30° to 145°F (-1°C to 63°C)
Power Consumption (without camera):
9 amps @ 115 VAC typical at full load
Input Power Source options:
12VDC, 110 VAC, or 220 VAC
Outputs for Camera Power:
12VDC (24VDC / AC by special order)
Internal Power Available for Camera:
3 amps @ 12VDC on typical model
HD or H.264 PTZ Camera Support: Yes
Shipping:
22" x 13" x 16"
19 lbs (8.6 Kg)

Engineered and
Built
in the **US**

Features:

- Virtually indestructible Polycarbonate Thermal Plastic alloy material
- IP, CCTV, HD and analog PTZ camera compatible for almost all sizes and brands
- Active solid state COOLDOME™ Thermo-Electric Cooling System providing up to 45° F Differential protects sensitive electronics in hot climates
- Internal Thermo-blanket permits sensitive electronics to be mounted in direct sunlight
- Internal bracket included for perfect fit for PTZ, megapixel or mini domes
- Switchable upper and lower camera mounting locations for maximum versatility and internal storage space utilization
- Internal mounting space for: routers, cell networks, NVR, hard drives, UPS, WiMAX, mesh hardware, etc
- IP66 rated: airtight and sealed against outside air, dust, water and salt water includes IP68 water proof connection ports
