

Industrial-strength commercial NVR machines, boasting world-class technology at affordable prices

Video processing requires high-performance computing equipment to support digital image recording and playback.

Dotworkz NVR machines offer the perfect blend of fail safe features, high performance and data storage simplicity, with remote management flexibility and control.

Our open-platform NVR machines are expandable, upgradeable, available in multiple configurations, and can be pre-configured with many popular VMS software solutions. (Optional Accessory: bootable OS in a USB thumb drive.)
